

More time to observe, listen and support.

Family communication, pedagogical documentation
and nursery management in one platform.

For nurseries and early years centres (ages 0-6).

Designed around real nursery life

Created in a nursery and designed by early years teachers, KinderTIC supports publicly run and private settings, especially for ages 0-3 and also 3-6. It brings together educational practice, families and administration through modules each setting configures to suit its needs. It evolves with teachers and our own technical team.

Available in English, Spanish and Catalan.

Communication

Diaries, messages and notices that reach the right people.

Pedagogy

Observations, room diaries and reports rooted in daily practice.

Management

Enrolment, attendance, billing and documents without re-entering data.

ONE PLATFORM, FOUR PERSPECTIVES

Early years team

Record and share what is needed.

Families

Receive clear, private information.

Nursery managers

Organise the nursery and view its data.

Providers and local authorities

Coordinate access to multiple centres.

SINCE

2012

+250

centres have placed their trust in KinderTIC

Communication that supports everyday life

Each family receives updates about their child.
The team chooses what to share, with whom and when.

Daily diary

Sleep, meals and observations, with settings to suit each group.

Messages and notices

Group and role-based communication, replies and read receipts.

Photos and videos

Moments from nursery life, with image permissions and private access.

Sharing everyday life

Room diary, activity feed and shared family journal to bring families and nursery closer, on the website and app.

Documenting to understand each child

Recording everyday nursery life helps you understand how children play, build relationships and learn.

Child records and observations

Health information, contacts and permissions, with ongoing observations throughout the year.

Life in the room

Diaries, activities and images that put each experience in context.

Reports

Personalised progress reports, basic information records and early education summaries.

The team decides what to document and what to share with families.

From application to enrolment, without entering data twice.

Applications, enrolment and place renewals, with organised information for the team and less administration for families.

01

Applications

Families apply online. Publicly run settings can review documents, score applications against admission criteria and manage waiting lists. Private settings use a tailored form with no scoring.

02

Online enrolment

Application details carry over to the form. Families add contacts, health information, bank details and documents, without repeating information already provided.

03

Permissions and child records

Consent and code-based confirmations are recorded. One or two parents or guardians can take part. Documents remain linked to the child's record.

Administration that works for your nursery

Everyday information can feed into administrative processes. Less retyping, more control.

A CONNECTED PROCESS

01

Records

Attendance, meals and services.

02

Billing

Fees, discounts and service usage.

03

Payments

SEPA files and payment tracking.

TOOLS FOR FINANCIAL MANAGEMENT

Fees and discounts

Configurable fees, services, grants and discounts.

Monthly billing

Bills generated from recorded charges and service usage.

Unpaid fees

Check billing status and track payments.

Spanish Form 233 and exports

Prepare tax information and download reports.

**The team records information once.
It then supports the nursery's administration.**

A clear view of your centre and the whole network

Nursery managers, providers and local authorities can work with the information they need, according to their role.

For nursery managers

Centre information

View attendance, meals, enrolments, fee bills and documents.

Role-based access

Permissions for each staff member and group, with centralised information.

Monitoring

Lists, statistics and staff time records to review how the centre is running.

For providers and councils

Multiple centres

Access information for your assigned centres in one place.

Council processes

Applications, enrolment and documents linked to the service's criteria.

Coordination

Information to oversee centres and support their teams.

PDF, Excel or CSV

Downloads in the formats you need to continue working outside the platform, depending on the type of data.

A secure foundation. A team by your side.

Data protection and practical support to make the platform work for everyday nursery life.

Security

Hosting you can trust

Data hosted in Barcelona on infrastructure from providers certified to Spain's ENS High category.

Controlled access

Encrypted connections, roles and permissions, with control over image permissions.

Continuity

Daily backups and high availability measures.

Support

Getting started

Centre set-up and data imports when information is available in the required format.

Initial online training

Practical sessions for nursery managers, early years teams and administrators.

Direct support

Online chat and telephone support from our own team, who know the platform.

Technology is a tool for adults.
The time it saves goes back into relationships with children.

KinderTIC, at a glance

Available features depend on each centre's modules and configuration.

Communication

- Individual or group daily diaries, configurable.
- Messages and notices with attachments and replies.
- Read tracking and automatic reminders.
- Activity feed and document library.
- Website, app and notifications.

Pedagogy

- Ongoing observations and custom grids.
- Written, item-based or combined reports.
- Basic information record and early education summary.
- Planning and scheduled activities.

Children, families and staff

- Groups, groupings and current or former pupils.
- Child records: details, health and permissions.
- Guardians, contacts and authorised collectors.
- Sibling links and shared information.
- Staff roles and permissions.

Financial management

- Fixed, one-off, occasional and concessionary fees.
- Grants, discounts and payment vouchers.
- Records of materials and additional services.
- Automatic billing and SEPA files.
- Unpaid fees, instalments and payment plans.
- Spanish Form 233 and billing summaries.

Nursery life and images

- Photos and videos with child tagging.
- Image permissions and private access.
- Room diary and shared family journal.
- Comments and optional manager approval.
- Download activities and complete albums.

Centre organisation

- Nursery calendar and personal reminders.
- Menus, timetables and room bookings.
- Attendance and meals: records and statistics.
- Staff working time records.

Applications and enrolment

- Publicly run: scoring and waiting lists.
- Private: application forms tailored to the centre.
- Online enrolment with configurable forms.
- Consent and confirmation by one or two guardians.
- Progress tracking and place renewals.

Leadership and shared services

- Coordinated management of multiple centres.
- Lists and exports in PDF, Excel or CSV.
- Centre details, branding and configurable modules.
- Past years' records and file management.
- Backups and encrypted connections.
- Online training, chat and telephone support.

Let's talk about your nursery

We'll show you KinderTIC using the processes you work with every day and answer your team's questions.

A demonstration tailored to you

For the manager, the early years team or the person responsible for administration.
